

## Featured Solutions Quick Reference Guide

### Termidor® HE High-Efficiency Termiticide

- Cut time and labor in half on liquid termite treatments
- Smaller trenches, fewer drilled holes, and shallower treatment depths
- Spend less time on site and more time growing your business

BASF Time & Motion study

### Trelona® ATBS Annual Bait Stations

- Active protection with annual inspections
- PMPs own the product and account: no reporting or added fees
- Termites find the station faster<sup>1</sup> with increased soil-to-bait contact

<sup>1</sup>2012 University of Delaware, Graduate Research Dissertation

### Alpine® WSG Water Soluble Granule Insecticide

- Non-repellent, non-pyrethroid option that makes a clear finished solution
- Great on German cockroaches, fleas, flies, and occasional invaders
- Excellent ant control with transfer
- Flexible label, allows for applications both indoors and outdoors

### Fendona® CS Controlled Release Insecticide

- 100% micro-encapsulated formulation
- Wide spectrum insecticide that works great on spiders, mosquitos, and other pests
- Ideal for quarterly services

### PT® Alpine Pressurized Fly Bait

- One-of-a kind aerosol fly bait
- Use as a band treatment, for area treatments and as a removable bait placement in both commercial and residential settings
- Remains attractive and effective against flies for 30 days – even against imidacloprid-resistant house flies

### Ridesco® WG Insecticide

- Quick release formulation swiftly reduces pest populations
- Two proven active ingredients impact different physiological pathways
- Ideal for cleanouts, one-time services and callbacks
- Dry formulation, flexible label, and one simple rate

### PT Alpine Flea & Bed Bug Pressurized Insecticide

- Non-soaking, fast drying formulation for application to mattresses, carpets, and more
- Fast knockdown and 30 day residual activity of adult fleas and kills hatching eggs for up to 7 months
- Kills bed bugs on contact with 21 day residual activity on multiple surfaces

### Selontra® Rodent Bait

- Non-anticoagulant solution delivers fast colony kill, even to resistant rodents
- Stop-feed action means rodents only eat a lethal dose, leading to greater bait availability and shorter baiting cycle
- Low risk of secondary toxicity to birds and mammals

### Termidor® Foam Termiticide/Insecticide

- Go-to for above ground termite spot treatments when fast results are needed
- Unique formulation has thicker, stronger cell walls that last up to 6 times longer than other foams

**Always read and follow label directions.**

Pests	Key Products by Pest <small>See the BASF Pest Control Solutions product catalog for complete listing of available solutions</small>			
<b>Ants</b> 	<b>Alpine® WSG Water Soluble Granule Insecticide</b> Indoor and outdoor application, plus food handling areas Non repellent A.I. complements bait applications Demonstrated transfer on ants	<b>Termidor® SC Termiticide/Insecticide</b> Outdoor, on-structure application, up to 4x per year Genuine transfer effect	<b>Advance® Ant Baits</b> Indoor and outdoor application Blend of different ingredients and grit sizes to address various ant species	<b>PT® Alpine Pressurized Insecticide</b> Indoor crack and crevice and void application
<b>Bed Bugs</b> 	<b>Alpine WSG Water Soluble Granule Insecticide</b> Non-repellent solution effective against pyrethroid-resistant strains	<b>PT Alpine Flea &amp; Bed Bug Pressurized Insecticide</b> Non-soaking formulation for application directly to affected areas, including mattresses	<b>Alpine D Dust Insecticide</b> Dust application for voids and hard to reach areas	<b>PT Phantom® II Pressurized Insecticide</b> Long-term residual for crack and crevice application
<b>Cockroaches</b> 	<b>Alpine WSG Water Soluble Granule Insecticide</b> Indoor and outdoor application, plus food handling areas Non-repellent compatible with cockroach baits	<b>Alpine Cockroach Gel Bait</b> Indoor and outdoor applications, plus food-handling areas Apply to cracks and crevices	<b>Avert® DF Dry Flowable Cockroach Bait</b> Bait/ingestion insecticide for use in wall voids and cracks and crevices	<b>PT Alpine Pressurized Insecticide</b> Indoor crack and crevice and void application Non-repellent compatible with cockroach baits
<b>Fleas</b> 	<b>PT Alpine Flea &amp; Bed Bug Pressurized Insecticide</b> Non-soaking formulation for application to carpets and more		<b>Alpine WSG Water Soluble Granule Insecticide</b> Indoor and outdoor application Apply to baseboards, floors and under furniture	
<b>Flies</b> 	<b>PT Alpine Pressurized Fly Bait</b> Use for area treatments where flies congregate Also for use in removable bait stations	<b>PT Fendona® Pressurized Insecticide</b> Indoor and outdoor application where flies congregate	<b>Alpine WSG Water Soluble Granule Insecticide</b> Indoor and outdoor application Application to areas where flies are found, including resting and breeding areas Fast kill	
<b>Mosquitos</b> 	<b>Fendona CS Controlled Release Insecticide</b> Long-lasting microencapsulated technology; outdoor applications against mosquitos and other pests Apply on surfaces where mosquitos rest, including shrubbery and flowerpots Can be used with mist blower to apply in hard to reach areas			
<b>Rodents</b> 	<b>Selontra® Rodent Bait</b> Non-anticoagulant, highly palatable bait delivers fast colony kill, even to resistant rodents Stop-feed action of the A.I. means rodents only eat a lethal dose, leading to greater bait availability and shorter baiting cycles			
<b>Spiders, Scorpions and Occasional Invaders</b> 	<b>Fendona CS Controlled Release Insecticide</b> Microencapsulated formulation with proven durability for outdoor conditions Better surface coverage with different size microcaps Alpha-cypermethrin 4 times more powerful than cypermethrin for lasting results against perimeter pests	<b>PT Fendona Pressurized Insecticide</b> Crack and crevice application where pests enter Proven fast knockdown and long-lasting control of key pests	<b>Ridesco WG Insecticide</b> Quick release formulation allows active ingredients to hit spiders immediately Two proven active ingredients impact different physiological pathways Can be used in most locations, outdoors and indoors, including food handling areas	<b>PT Tri-Die® Pressurized Dust Insecticide</b> Dust application for voids and hard-to-reach areas Use in cracks and crevices, voids, gaps around doorways and windows
<b>Termites</b> 	<b>Termidor® HE High-Efficiency Termiticide</b> Liquid, one-of-a kind formulation allows for shallower treatment depths, less drilling and smaller trenches, requiring less labor on the job Combine with EP/LI label directions to maximize time and labor savings	<b>Trelona® ATBS Annual Bait Stations</b> Intercepts termites as they forage, providing structural protection through colony elimination; active from the time of installation Faster hits, faster transfer, faster control	<b>Termidor Foam Termiticide/Insecticide</b> Ready-to-use foam that works well as a spot treatment for above ground termite activity Fast results, easy-to-use, better coverage and coating of wood studs inside wall voids, less dripping	<b>Termidor SC Termiticide/Insecticide</b> Traditional liquid treatment that's been the industry standard for 25 years Also labeled for ants, spiders and 10+ key pests
